REPORT ON REVIEW OF INTERIM CONSOLIDATED FINANCIAL STATEMENTS

To: The shareholders of Everpia Joint Stock Company

We have reviewed the accompanying interim consolidated financial statements of Everpia Joint Stock Company ("the Company") and its subsidiary, as prepared on 25 August 2020 and set out on pages 6 to 47 which comprise the interim consolidated balance sheet as at 30 June 2020, the interim consolidated income statement and the interim consolidated cash flow statement for the six-month period then ended and the notes thereto.

Management's responsibility

The Company's management is responsible for the preparation and fair presentation of the interim consolidated financial statements in accordance with Vietnamese Accounting Standards, Vietnamese Enterprise Accounting System and the statutory requirements relevant to preparation and presentation of interim consolidated financial statements, and for such internal control as management determines is necessary to enable the preparation and presentation of interim consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express a conclusion on the interim consolidated financial statements based on our review. We conducted our review in accordance with Vietnamese Standard on Review Engagements No. 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity.

A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Vietnamese Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim consolidated financial statements do not give a true and fair view, in all material respects, of the interim consolidated financial position of the Company and its subsidiary as at 30 June 2020, and of its interim consolidated results of operations and its interim consolidated cash flows for the six-month period then ended in accordance with Vietnamese Accounting Standards, Vietnamese Enterprise Accounting System and the statutory requirements relevant to the preparation and presentation of the interim consolidated financial statements.

3.10 *Business combinations and goodwill*

Business combinations are accounted for using the purchase method. The cost of a business combination is measured as the fair value of assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange plus any costs directly attributable to the business combination. Identifiable assets and liabilities and contingent liabilities assumed in a business combination are measured initially at fair values at the date of business combination.

Goodwill acquired in a business combination is initially measured at cost being the excess of the cost the business combination over the Company's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities. If the cost of a business combination is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the interim consolidated income statement. After initial recognition, goodwill is measured at cost less any accumulated amortization. Goodwill is amortized over 10-year period on a straight-line basis. The parent company conducts the periodical review for impairment of goodwill of investment in subsidiary. If there are indicators of impairment loss incurred is higher than the yearly allocated amount of goodwill on the straight-line basis, the higher amount will be recorded in the consolidated income statement.

Under the equity method, the investment is carried in the interim consolidated balance sheet at cost plus post acquisition changes in the Company's share of net assets of the associates. Goodwill arising on acquisition of the associate is included in the carrying amount of the investment. Goodwill is not amortised and subject to annual review for impairment. The interim consolidated income statement reflects the share of the post-acquisition results of operation of the associate.

The share of post-acquisition profit/(loss) of the associates is presented on face of the interim consolidated income statement and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. Dividend/profit sharing receivable from associates reduces the carrying amount of the investment.

The financial statements of the associates are prepared for the same reporting period and use the same accounting policies as the Company. Where necessary, adjustments are made to bring the accounting policies in line with those of the Company.

On issuance of the convertible bond, the fair value of the liability component is determined by discounting the future payment (including principal and interest) to present value at the market rate for an equivalent non-convertible bond less issuance cost.

The remainder of the proceeds is allocated to the conversion option that is recognised and included in shareholders' equity. The carrying amount of the conversion option is not re-measured in subsequent years.
